

TProcessor

IEventStore

art::TTreePeriodicEventStore

```
classDiagram
    class TProcessor
    class IEventStore
    class art_TTreePeriodicEventStore["art::TTreePeriodicEventStore"]
    art_TTreePeriodicEventStore --|> TProcessor
    art_TTreePeriodicEventStore --|> IEventStore
```

The diagram illustrates a class hierarchy. At the top, there are two base classes: TProcessor and IEventStore. Below them is a derived class named art::TTreePeriodicEventStore. Two arrows point from the derived class to the base classes, indicating inheritance.
