

TProcessor

IEventStore

art::crib::TTreePeriodicEventStore

```
classDiagram
    class TProcessor
    class IEventStore
    class art_crib_TTreePeriodicEventStore["art::crib::TTreePeriodicEventStore"]
    TProcessor <|-- art_crib_TTreePeriodicEventStore
    IEventStore <|-- art_crib_TTreePeriodicEventStore
```

The diagram illustrates a class hierarchy. At the top, there are two base classes: TProcessor and IEventStore. Below them, a single class named art::crib::TTreePeriodicEventStore is shown. Two arrows point from the bottom class to the two base classes, indicating that art::crib::TTreePeriodicEventStore inherits from both TProcessor and IEventStore.
