

TProcessor

IEventStore

art::TTreePeriodicEventStore

```
classDiagram
    class TProcessor
    class IEventStore
    class art_TTreePeriodicEventStore["art::TTreePeriodicEventStore"]
    art_TTreePeriodicEventStore --|> TProcessor
    art_TTreePeriodicEventStore --|> IEventStore
```

The diagram illustrates a class hierarchy where `art::TTreePeriodicEventStore` is a specialized class that inherits from both `TProcessor` and `IEventStore`. This is represented by a single line from the child class box branching into two arrows, each pointing to one of the parent class boxes.
